

## Recommended reading from Proteaflo

In addition to our online bookshop, Proteaflo suggests the following reference titles to enhance your knowledge of proteas.

**"The Banksia Book"** by Alex George

All 73 species described and photographed. An excellent reference for all banksia growers.

**"Australian Native Plants: Propagation, Cultivation and Use in Landscaping"**. 4th Edition by J Wrigley and M Fagg

A comprehensive reference book for any Australian native plant enthusiast. A wealth of sound practical advice and superb illustrations. Over 500 colour plants and more than 170 line drawings.

**"The Austraflo A-Z of Australian Plants"** by B Mollyneux & S Forrester

Everything you need to know to successfully choose and grow more than 1600 attractive and interesting Australian plants. Each plant described in detail - its eventual size, flowers, fruit and foliage, climate and soil type, its preferred situation and its form. Excellent, quick reference for designers and home gardeners.

**"Growing Proteas"** by Rob McLennan

Covers all aspects of growing Proteas, including propagation, site selection, planting, fertilising and pruning. It also includes a chapter on marketing strategies and picking and handling for the cut flower market.
